

Guillaume Dumas

React/Next.js, TypeScript, APIs and real-time web apps, with enough backend awareness to understand the whole flow.

ABOUT

Frontend developer from Grenoble, trained at 42 School Lyon after a first career in high-end leather craft.

I'm at my best when product complexity needs a clear interface, especially when messy flows or live states have to feel obvious to the person using them.

I care about details and the small defects users feel before they can describe them.

EXPERIENCE

Jupiter

Early 2026

Frontend Consultant - Remote

Frontend work on Jupiter Predict, a live market product inside a large React and TypeScript codebase.

- Reworked activity, For You, live option and leaderboard screens.
- Improved chart behavior, payment UI and desktop/mobile states.

Adrena

Late 2025

Frontend Intern - Remote

Joined a trading product team and shipped roughly 30 merged PRs across UI, swaps and optimized API work.

- Reworked trading UI, token selector, staking leaderboard and ALP screens.
- Integrated Jupiter swaps, campaign UI and mobile layout fixes.

Versus

2024 - 2025

Founder & Developer - Remote

Built a real-time betting product around live AI fighting matches. Public testing: 100+ testers, around 100 SQL in total volume.

- Owned the Twitch scraper, oracle and monorepo work.
- Handled timing bugs, invalid matches, refunds and payout logic.

42 Lyon

Late 2023 - Mid 2025

Common Core Graduate - Lyon, France

Completed the peer-reviewed 42 Common Core through low-level, systems and web projects.

- Built projects in C, C++, Unix, networking, graphics and Docker.
- Finished ft_transcendence: a Pong platform with multiplayer tournaments in a custom TypeScript SPA.

Magicake / Doge Capital

2021 - 2024

Founder, Board Member

Built product, community and strategy experience around digital projects and online communities.

- Handled communication, operations, business development and strategic decisions.

HARD STACK

TypeScript React Next.js
